

Hager stylea
wiring accessories

Dear Friends and Partners,

We are pleased to present the Hager stylea catalogue 2014.

Hager stands for sustainability and our E3 Initiative is an excellent example of this. Fully aware of our responsibility to both society and the environment, we are proud to make a contribution to the better use of the limited available resources. It is a belief that plays a vital role in all our new developments. The three Es, by the way, stand for the categories of “ethics, environment and eco-efficiency”. And behind each category there is an actual catalogue of measures to which Hager is expressly committed, measures including: the United Nation Global Compact initiative, which the Hager Group joined in 2007; and the environmental standard ISO 14000, to which most of our sites are already certified to. In this respect, ecological development and production technologies are given as much careful consideration as to the products themselves that make a contribution to make better use of the resource electricity.

Innovation, customer proximity, simplicity and reliability are the very basis of the Hager brand. We keep in close contact with our customers, regularly surveying their wishes and needs before incorporating that feedback into the development of our new systems. The same applies to this brochure which we have designed for you as a practical tool. Why not have a browse and find out for yourself?

Best regards

Daniel Hager

The partner for smart solutions you can trust

Hager is a full-range supplier of electrical installation systems for building, residential and commercial properties. For decades, Hager has been synonymous with an extensive and complete offering. Highest quality, cutting-edge products, modularity, ease of installation, ease of use, excellent service and sophisticated design are the features that distinguish Hager.

Hager: a brand meeting your expectations

As a specialist in

- energy distribution,
- cable management and room connection systems,
- wiring accessories and smart building automation
- safety technology such as alarm systems, smoke detectors and motion detectors.

Hager the supplier for professionals – is a synonym for top quality and innovative technology, as well as good customer relations and reliability. All of which make Hager the partner for smart solutions, you can trust.

New ideas for customers' benefit

Innovations and the systematic enhancement of the products and systems are key features of the Hager brand. It has always been our goal to use new designs and improvements to stay ahead of developments.

The use of innovations and new technologies at Hager is always customer-driven. Every year, Hager evaluates thousands of customer contacts, resulting in detailed knowledge of its customers' needs in order to work efficiently and successfully. Based on this knowledge, Hager develops the innovative solutions that are so characteristic for the Hager brand. Ease of installation, ease of use, intuitive user interfaces, modularity and durability are brand values that guarantee highest quality throughout in Hager systems.

65 percent of Hager products are less than 3 years old. This high degree of innovation enables the users to meet various new challenges effectively. The strong demand for innovations and enhancements is a good indicator for the customer-oriented policy of the Hager brand also resulting in a high turnover at wholesalers.

A flourishing group

Hager belongs to the Hager Group, which is a family owned business with a more than fifty-year tradition. As a global player, the company has about 11,400 employees and a turnover of more than 1.6 billion Euro in 2012.

Hager regional support Middle East operations

With an objective of offering technical and commercial support to our customers in the Middle East and Near East regions, Hager Group set up its 100% owned subsidiary, Hager Middle East FZE, at Jebel Ali Free Zone in 1997.

Today, Hager Middle East has a strong commercial team with expertise in sales & marketing, product management, logistics, customer service and finance. In 2012, to expand the operations in the Middle East, Hager has opened an office “Hager Electro B.V” in Kingdom of Saudi Arabia. Hager Middle East has regional representation in Kuwait and Qatar.

Hager stylea wiring accessories

Touch of style

The large flat rocker switch, with its slim front plate and clean style, is designed for contemporary residential and commercial environments. The BS socket is available in switched and unswitched versions, in single and double pole, and with or without indicator. The data outlet range will allow an easy and quick connection to the networks, such as internet, phone, TV...

The advantages for you:

- Terminals are easy to identify, access and tighten.
- Installation time is reduced.

Technical data:

- Product ranges have been independently tested and certified.
- Faceplates are made from high grade PC ensuring excellent scratch, impact and UV resistance
- All sockets are provided with safety shutters, giving protection against accidental contact with live parts and ensuring safety for your children.

Expert tips

1

Terminals

The terminals all face in the same direction for ease of installation and are clearly identified.

2

Terminal screws

Terminal screws are supplied backed out to save installation time and are captive so they won't be lost.

3

Lead in

Moulded lead-ins help to guide the driver blade to the screw head.

4

Capacity increase

Increased wiring capacity of the new 13A socket terminals permits the use of today's larger cables and reduces installation time.

5

Safety shutter

Shutter design gives protection against access to live parts and protects the safety of your children.

6

Dust proof

Protection sticker on sockets which prevents dust pollution during the installation.

7

Switches

Single pole switches are simplified to 2 parts - rocker and plate which makes installation easier and quicker.

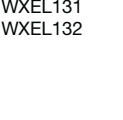

8

High safety

All switches are equipped with a 'no-welding' design which ensures a compulsory break when contact welding occurs. 10AX switches do not require derating for fluorescent loads.

- Complies with BS EN 60669-1 IEC 60669-1 CB certificate
- 'AX' rated - No need to derate for fluorescent loads
- Supplied with M3.5 x 25 mm long fixing screws
- Capacity of each terminal:
3 x 1.5 mm²
2 X 2.5 mm²
- Two way switches can be wired either 1 way or 2 way
- Terminal markings denote:
L1 = one way
L2 = two way
C = common
- Material: Polycarbonate

- Complies with BS EN 61558-2-5 IEC 61558-2-5 CB certificate
 - Supplied with M3.5 x 25 mm long fixing screws
 - Designed for use in bathrooms and washrooms and incorporates a double wound isolating transformer for an earth free supply.
 - Capacity of each terminal: 2 x 2.5 mm²
 - Primary circuit is protected by a self-resetting thermal overload device. Insertion of shaver plug automatically switches on the transformer, removal automatically switches it off.
 - Material: Polycarbonate
- Input 230V a.c. output dual voltage 230V a.c. and 115V a.c. outlets rating 20VA on either voltage
- A positive interlock prevents 2 plugs being inserted simultaneously

IP55

Switches and sockets

The Hager IP55 range has clear silicon gaskets which allows identification of switch position without lifting the cover. The products are rated to IP55 in accordance to BS EN 60529 to provide high level of ingress protection.

The advantages for you:

- Clear silicon gasket allows operation of switch without lifting cover.
- Clear silicon gasket allows to see the ON/OFF position of the switch at a distance
- Large switch rocker allows easy operation.
- Mounting screw locations are segregated from the back box by gaskets for improved IP installation.

Expert tips

1

Clear membrane

IP55 switches can be operated through the clear membrane, thereby maintaining full P55 rating.

3

Status visibility

Status of the switch ON/OFF can be seen through the clear membrane.

2

Easy connection

20mm conduit knockouts are available on all 4 sides.

- Available in 1, 2 and 3 gang
- Complies with BS EN 60529: IP test BS EN 60669-1: switches

Features

- Clear silicon gasket allows operation of switch without lifting cover.
- Clear silicon gasket is replaceable.
- Large switch rocker allows easy operation.
- Mounting screw locations are segregated from the back box by gaskets for improved IP installations.
- 20mm² conduit entries available on all sides
- IP rated cable gland included.

Technical data

- IP55
- 250V 10AX rated switches
- 1 way and 2 way models
- Switch terminals capable of taking 3 x 1.5mm² or 2 x 2.5mm² cables
- Earth terminal mounted in back box.

IP66

Beautifully safe

With its rugged good look and ease of operation you can be sure that IP66 will provide protection for your wiring accessories in even the toughest of environment.

A host of innovative design solutions provide both installer and end user with a range of products that is easy to work with and retain their good looks whatever the environment throws at them.

The advantages for you:

- IP66 complete protection from dust and high pressure water jets
- Easy to open catch and unique 180° opening lid
- Suitable for moulded on plugs
- Padlock can be fitted to prevent unauthorised use

Technical data:

- IP66 rating conforms to IEC/ BS EN 60529
- Functional products tested and certified to appropriate British/ IEC Standards. Product range has been independently tested and certified

Expert tips

1

Suitable for moulded-on plugs

Extended enclosure and extra wide gel seal means even moulded on plugs can be accommodated.

2

Padlockable

A padlock of up to 5mm diameter shank can be fitted to the enclosure to prevent unauthorised use.

3

Knockouts

20mm cable entry knockouts are secure and easily removed by pushing out from the inside of the back box.

4

180°

With its unique dual action hinge, the lid of the box can be opened a full 180 degrees for ease of plug insertion and switch operation.

5

Soft sealing

The factory fitted soft gel seal fits snugly around power cables to maintain the IP66 rating in use with the lid fully closed.

6

Drill Out

If 25mm conduit is needed, then a clearly marked drill out position allows safe and precise use of a 25mm hole saw.

7

Drain

The drain feature can be drilled out using a 5mm drill (opening the drain hole will reduce the IP rating of the product).

Complies with

- 13A socket outlets comply with BS 1363-2 & SS 145 part 2
- 15A socket outlets comply with BS 546 & SS 472
- Fused connection units comply with BS 1363-4
- IP66 rating conforms to IEC/ BS EN 60529

- Robust and rugged enclosures designed to withstand the elements.

Socket outlets

- Unique double hinge allows lid to fully open through 180°.
- Fixing point for padlock.

13A unswitched fused connection unit with flex outlet	103 x 116.5	1	WXPSU83FO

The range of IP66 isolators are designed to be used in outdoor applications with IP66 degree of protection. They are rated at AC23A and offer options of 2 poles, 3 poles and 3 poles with switched neutral. They are compact and easy to install.

Electrical specification:
Tested and complies with BS EN 60947-3

Rated voltage: 250V ~ AC
440V ~ AC

Rating AC23A.

Mechanical specification:
Protection Category: IP66
Material: Polycarbonate - UV grade

Devices and accessories:
DP 20-63A (4 ratings)
TP & N 20-40A (3 ratings)
TP & SW N 20-63A (4 ratings)

Technical information

Compliance with standards

Regulation 511-01-01 of BS 7671 : Requirements for Electrical Installations, IEE Wiring Regulations Sixteenth Edition is of particular importance to specifiers and installers with respect to product standards.

Regulation 511-01-01 requires every item of equipment to comply with the relevant requirements of the applicable British Standard, or Harmonised Standard appropriate to the intended use of the equipment.

British Standards (BS)

The BSI (British Standards Institution) was the first national standards body in the world. There are now more than 100 similar organisations which belong to the International Organisation for Standardisation (ISO) and the International Electrotechnical Commission (IEC).

British Standards are drawn up by all those who have a particular interest in the subject i.e. manufacturers, users, research organisations, government departments and consumers. This work is co-ordinated by BSI staff, acting as secretaries to the committees where the work is done. All standards are made available for public comment before they are published.

Harmonised standards

A Harmonised standard is a European standard formally presented by CENELEC, to the European Commission and published in the commission's official journal. CENELEC is the Comité Européen de Normalisation Electrotechnique i.e. European Committee for Electrotechnical Standardisation.

BS 7671 part 2 defines a harmonised standard as a standard which has been drawn up by common agreement between national standards bodies notified to the European Commission by all member states and published under national procedures. The UK national standards body is the British Standards Institution. In the UK a harmonised standard will normally be published as a British Standard European Norm i.e. BS EN.

British Standard European Norm (BS EN)

CENELEC European standards are pre-fixed EN (European Norm). Adoption of the European Standard within the EC is mandatory and member countries of CENELEC are obliged to publish them unchanged. In the UK such standards are further endorsed with the additional prefix 'BS', for example BS EN 60669-1 : 1996 is the British Standard European Norm for Switches for household and similar fixed electrical installations.

Whilst a European Standard can be a direct replica of an IEC standard, discussions within CENELEC may result in the formulation of a standard which includes commonly agreed variations and Special National Conditions.

International Electrotechnical Commission (IEC)

Founded in 1906 the International Electrotechnical Commission (IEC) is the world organisation that prepares and publishes international standards for all electrical, electronic and related technologies. The membership consists of 60 participating countries, including all the world's major trading nations and a growing number of industrialising countries.

Foreign national standards based on IEC standards are permitted to be used by BS 7671. However the specifier must verify that any differences between the foreign standard and the corresponding British Standard or Harmonised Standard does not result in any lesser degree of safety than that afforded by compliance with the British Standard. This assessment would probably need to be made by specialists.

Conclusion

BS 7671 (IEE Wiring Regulations) recognises equipment which complies with a British Standard or Harmonised Standard appropriate to the intended use of the equipment without the need for further qualification.

Hager products have always been designed and manufactured to a high standard to ensure compliance with the current British or Harmonised standards. See the table below for further information.

Product description	Compliance	Description
Switches	BS EN 60669-1 : 2000 IEC 60669-1 Ed.3.2b : 2007 CB certificate	Switches for household and similar fixed electrical installations
Indicators	BS 5733 : 1995	General requirements for Electrical Accessories
Fused connection unit, cord outlets	BS 5733 : 1995	Switches for household and similar fixed electrical installations with particular requirements for timedelay switches (TDS)
Dimmers	BS EN 60669-2-3 : 2006	Switches for household and similar fixed electrical installations with particular requirements for timedelay switches (TDS)
Frames and plates	BS 5733 : 1995	Switches for household and similar fixed electrical installations with particular requirements for timedelay switches (TDS)
Boxes	BS 4662 : 1980 or IEC 60670-1 : 2002	Specification for boxes for the enclosure of electrical accessories
10A Wall switch	BS EN 60669-1 : 2000 IEC 60669-1 Ed.3.2b : 2007 CB certificate	Switches for household and similar fixed electrical installations
Dimmer switches	BS EN 60669-2-1 : 2004 IEC 60669-2-1 Ed.4.0b : 2002	Electronic variable control switches (dimmer switches) for tungsten filament lighting
13A Socket Outlets	BS 1363 : Part 2 : 1995 SS145 SASO 2203 : 2003	13A plugs, socket-outlets, adaptors and connection units 13A DP switched socket outlets
15A Switched Socket	BS 546 : 1950 (1988) SS472	Specification. Two-pole and earthing-pin plugs, socket-outlets and socket-outlet adaptors
20A DP Switches	BS EN 60669-1 : 2000 IEC 60669-1 Ed.3.2b : 2007 CB certificate	Switches for household and similar fixed electrical installations
13A Fused Connection Unit	BS 1363 : Part 4 : 1995	Specification for 13A fused connection units switched and unswitched
45A DP Switches	BS EN 60669-1 : 2000 IEC 60669-1 Ed.3.2b : 2007 CB certificate	Switches for household and similar fixed electrical installations
45A Cooker Control Unit	BS 4177 : 1992	Cooker control units
Shaver Socket Outlet	BS EN 61558-2-5 : 1998 IEC 61558-2-5 : 1997	General Requirements Isolating transformers and safety isolating transformers Electromagnetic compatibility, immunity requirements for household CB certificate appliances tools and similar apparatus.
25A/45A Flex Outlet Plate	BS 5733 : 1995	General Requirements for Electrical Accessories
BS Batten	BS EN 61184 : 1997	Home office shield are T2 rated
Ceiling rose	BS 67	

Objective of CE marking.

CE marking is a “technical passport” which indicates that a product conforms to all relevant directives which require CE marking, thus enabling the product to travel within the E.U.

A directive is a piece of mandatory European Legislation implemented by regulations in all member countries. Its purpose is to allow free movement of goods that are safe and fit for use into and within the European Union.

CE marking is not a quality mark and it does not indicate that any testing or certification has been carried out.

The marking.

CE marking is a statement by the manufacturer that the product complies with the essential requirements of all relevant Directives, notably in the area of technical safety and conformity assessment.

CE marking can appear on the product or packaging or documentation or combination thereof dependant upon which directive it has to comply with.

CE marking is a very specific graphical symbol and must be clearly separated from other marks.

**Directives.**

It is the responsibility of the manufacturer or his authorised representative who places the product onto the EC market to decide which Directive(s) apply and to ensure the CE marking is affixed by the dates stated in the relevant directive(s)

For the majority of Hager products only one directive is applicable this is referred to as the Low Voltage Directive. Where some products incorporate electronic devices the Low voltage Directive and the Electromagnetic Compatibility Directive are applicable.

The Low Voltage Directive.

EC directives are requirements adopted by the European Council and published in the Official Journal of the European Communities and are addressed to the member states.

European Council Directive 73/23/EEC with an amendment 93/68/EEC is known as the Low Voltage Directive.

The Low Voltage Directive has been implemented into UK law by the “ Electrical Equipment (Safety) Regulations 1994” and apply to all electrical / electronic equipment operating at a voltage of 50-1000 V a.c. or 75-1500 V d.c.. They do not apply to plugs, socket outlets and adapters which are covered by the Plugs and Sockets (Safety) Regulations 1994.

Relationship between the Electrical Equipment (Safety) Regulations, Harmonised standards and the IEE Wiring Regulations Sixteenth Edition.

The Electrical Equipment (Safety) Regulations requires electrical equipment to be safe. Electrical equipment which satisfies the safety provisions of Harmonised standards shall be taken to comply with this requirement, unless there are reasonable grounds for suspecting that the equipment does not so comply.

Regulation 511-01-01 of BS 7671 Requirements for Electrical Installations, IEE Wiring Regulations Sixteenth Edition requires every item of equipment to comply with the relevant requirements of the applicable British Standard, or Harmonised Standard appropriate to the intended use of the equipment.

The first character numeral

indicates the degree of protection provided by the enclosure with respect to persons and solid objects, also to the equipment inside the enclosure.

The second character numeral

indicates the degree of protection provided by the enclosure with respect to harmful ingress of water; a third character may be used to indicate mechanical strength. An x signifies that no test has been carried out.

The first character numeral protection against solid substances

IP	Test	Short Description	Definition
0		Non - protected	No special protection
1		Protected against solid objects greater than 50mm	A large surface of the body, such as a hand (but no protection against deliberate access) solid objects exceeding 50mm in diameter.
2		Protected against solid objects greater than 12.5mm	Fingers or similar objects not exceeding 80mm in length; solid objects exceeding 12.5mm in diameter
3		Protected against solid objects greater than 2.5 mm	Tools, wires, etc...., of diameter or thickness greater than 2.5 mm; solid objects exceeding 2.5 mm in diameter
4		Protected against solid objects greater than 1.0 mm	Wires or strips of thickness greater than 1.0 mm; solid objects exceeding 1.0 mm in diameter
5		Dust-protected	Ingress of dust is not totally prevented but dust does not enter in sufficient quantity to interfere with satisfactory operation of the equipment
6		Dust - light	No ingress of dust

The second character numeral protection against liquid substances

IP	Test	Short Description	Definition
0		Non - protected	No special protection
1		Protected against dripping water	Dripping water (vertically) falling drops) shall have no harmful effect
2		Protected against dripping water when tilted up to 15°	Vertically dripping water shall have no harmful effect when the enclosure is tilted at any angle up to 15° from its normal position
3		Protected against spraying water greater than 60°	Water falling as a spray at an angle up to 60° from the vertical shall have no harmful effect
4		Protected against splashing water	Water splashed against the enclosure from any direction shall have no harmful effect
5		Protected against water jets	Water projected by a nozzle against the enclosure from any direction shall have no harmful effect
6		Protected against heavy seas	Water from heavy seas or water projected in powerful jets shall not enter the enclosure in harmful quantities
7		Protected against the effect of immersion	Ingress of water in a harmful quantity shall not be possible when the enclosure is immersed in water under defined conditions of pressure and time
8		Protected against submersion	The equipment is suitable for continuous submersion in water under conditions which shall be specified by the manufacturer

Warranty:

A warranty period of 10 years* is offered on Hager products, from date of manufacture, relating to any material or manufacturing defect.

The warranty is withdrawn if:

After inspection by Hager quality control department the device is found to have been installed in a manner which is contrary to IEE wiring regulations and accepted practice within the industry at the time of installation.

Warranty does not include damages or scratches caused due to inappropriate cleaning or use of any abrasive material.

An explanation of defect must be included when returning the goods.

* Excludes electronic products, which have a warranty of 2 years from date of manufacture.
